GSA ALL PURPOSE SILICONE

Profile

GSA All Purpose Silicone is designed for sealing non-structural curtain wall joints, facade joints and system, EIFS, panels and metal cladding, expansion and movement joints, windows and perimeter joints. The product can be used for both new projects and remedial works. The sealant forms a durable, elastomeric, weather-tight and water-tight bond with most building materials in any combination, in particular; glass, ceramics and porcelains, stones (granite/ marble/ sandstone/ slate), masonry surfaces, tiles, wood, steel, anodized aluminium and painted surface. Primer is not required in most cases. It can be used for roofing construction materials such as galvanized and zinc-coated steel, aluminium and some plastics.
